

Statement of Verification

BREG EN EPD No.: 000328

Issue 01

This is to verify that the

Environmental Product Declaration

provided by:

EcoTherm Insulation Ltd

is in accordance with the requirements of:

EN 15804:2012+A1:2013

and

BRE Global Scheme Document SD207

This declaration is for:

EcoTherm Eco-Liner

Company Address

Harvey Rd
Burnt Mills Industrial Estate
Basildon
SS13 1QJ

Signed for BRE Global Ltd

Emma Baker

Operator

05 January 2021

Date of this Issue

05 January 2021

Date of First Issue

04 January 2026

Expiry Date

This Statement of Verification is issued subject to terms and conditions (for details visit www.greenbooklive.com/terms.)

To check the validity of this statement of verification please, visit www.greenbooklive.com/check or contact us.

Environmental Product Declaration

EPD Number: 000328

General Information

EPD Programme Operator	Applicable Product Category Rules
BRE Global Watford, Herts WD25 9XX United Kingdom	BRE Environmental Profiles 2013 Product Category Rules for Type III environmental product declaration of construction products to EN 15804:2012+A1:2013
Commissioner of LCA study	LCA consultant/Tool
EcoTherm Insulation UK Ltd Harvey Rd Burnt Mills Industrial Estate Basildon SS13 1QJ	BRE LINA Tool v2.07
Declared/Functional Unit	Applicability/Coverage
1m ² of PIR insulation at a thickness that gives an R-value of 3.00m ² .K/W	Product Specific.
EPD Type	Background database
Cradle to Gate with options	Ecoinvent 3.2
Demonstration of Verification	
CEN standard EN 15804 serves as the core PCR ^a	
Independent verification of the declaration and data according to EN ISO 14025:2010 <input type="checkbox"/> Internal <input checked="" type="checkbox"/> External	
(Where appropriate ^b)Third party verifier: Nigel Jones	
<small>a: Product category rules b: Optional for business-to-business communication; mandatory for business-to-consumer communication (see EN ISO 14025:2010, 9.4)</small>	
Comparability	
Environmental product declarations from different programmes may not be comparable if not compliant with EN 15804:2012+A1:2013. Comparability is further dependent on the specific product category rules, system boundaries and allocations, and background data sources. See Clause 5.3 of EN 15804:2012+A1:2013 for further guidance

Construction Product

Product Description

EcoTherm Eco-Liner insulation baseboards consist of a high performance rigid thermoset fibre free PIR insulation core faced with Bilaminar foil/kraft paper facing on both sides. Product information is available on EcoTherm.co.uk

Technical Information

Property	Value, Unit
Thermal Conductivity - EN 13166:2012+A2:2016	0.022 W/m.K (25 – 70mm)
Compressive strength at 10% compression	140 kPa
Board Size at range of thicknesses	1.2 x 2.4 m

Main Product Contents

Material/Chemical Input	%
Rigid thermoset fibre free PIR insulation core	79%
Foil facer	21%

**Average percentages applicable for 1m² of insulation at thickness that gives an R-value of 3.000 m²K/W*

Manufacturing Process

EcoTherm PIR is made through a manufacturing process in which a foam forms an insulating core between two facing elements. At the start of the process a mix of chemicals is added directly to the bottom layer of facing and then expands to meet the top layer of facing. As it dries, the foam becomes tacky and adheres itself to the facing, top and bottom. Once it has reached the necessary thickness the foam is cooked under pressure. The insulation boards are then cut into the necessary sizes, packaged and sent to the loading bay for collection.

Process flow diagram

Construction Installation

The product will be installed in a variety of building wall applications using standard construction techniques.

Use Information

The product will be left alone after installation, and there are no known associated environmental impacts.

End of Life

The insulation will be removed for disposal when the building reaches the end of its life.

Life Cycle Assessment Calculation Rules

Declared / Functional unit description

1m² of insulation at a thickness that gives an R-value of 3.00m².K/W

System boundary

Cradle to gate with options: Modules A1-3, A4, A5, C2, C3 and C4.

The following processes are included in the A1-A3 production stage: Manufacture of preliminary products (resin, blowing agent, additives). Transportation of raw materials and preliminary products to the manufacturing site. Manufacturing process on the production site including, energy, disposal of residual materials, water consumption and VOC emissions to air.

The following process is included within the A4 construction stage: Transportation of the product to the construction site.

The following processes are included in the A5 construction stage: installation wastage rate, material wastes produced by installation.

The following processes are included in the C2, C3 and C4 End of life scenarios: Transportation of waste from the construction site to the waste processing plant, waste processing operations for recovery, waste sent to landfill.

Data sources, quality and allocation

This EPD covers all EcoTherm Eco-Liner insulation board is manufactured at the Basildon and Pembridge, representing 100% of production of these products in 2018 over all EcoTherm production sites included in this EPD, and 6.8% of the total site output at the Basildon site (458.91 tonnes) and 0.2% at the Pembridge site (48.15 tonnes).

A profile for the PIR foam was created separately as this covered a range of PIR products. The profile included all the impacts from the manufacture of the product, including all the data for the following sections: 'ancillary materials', 'packaging', 'fuel/energy', 'water', 'emissions to air, water and soil', 'production waste', 'other waste' and 'water discharged'. Allocation of these factors to the products was achieved by using a proportion of the total PIR foam output. The foam profile was then used as an input for this (and other) end product profiles.

Secondary data has been drawn from the BRE LINA database v2.0.62 and the background LCI datasets are based on Ecoinvent v3.2.

Cut-off criteria

No inputs or outputs have been excluded. All raw materials, packaging materials, associated transport to the manufacturing site, and from the manufacturing site to the building site, process energy, water use, direct production waste, installations waste and emissions are included.
